

PROFILE

A passionate, results-driven, articulate and analytical software developer who can think "outside of the box". Strong in design, as well as integration problem solving. Expert in many server-side and client-side programming languages including SQL. Highly skilled in developing business plans, requirements specifications, user documentation, architectural systems research. Maintains a high level of detail using version control and Agile (SCRUM) development methodologies.

EXPERIENCE

SOFTWARE DEVELOPER

*Prognosis Health Information Systems, Houston, Texas**Mar. 2012 - Present*

Work on an enterprise application migrating a legacy Cold Fusion application into series of CakePHP applications. We would also create new products that would integrate into the larger application. The products I work on are related to the medical and hospital management industry. I work with a team and follow SCRUM.

SOFTWARE DEVELOPER

*Brookside Studios, Tulsa, Oklahoma**2008 - 2012*

I create and manage enterprise level customer management systems, shopping carts and advanced web site content managers. Everything from the smallest form processor to full scale systems that run entire companies. I use PHP, Javascript, CSS, HTML, XML, xHTML, MySQL and rapid development frameworks CakePHP and jQuery almost daily.

SOFTWARE DEVELOPER

*Echelon Development, El Paso, Texas**2006 - 2008*

I worked for a large corporate real estate investor building PHP based web sites to help his companies market their properties. I worked via telecommute and faced many new challenges I had to solve with software.

SOFTWARE DEVELOPER

*Iron Fist Software, Tulsa, Oklahoma**2002 - 2006*

Programming everything from PC applications to advanced cold fusion web sites. I also built PHP and ASP web sites using SQL and Access databases.

CERTIFICATE

HARVARD UNIVERSITY

Cambridge, Massachusetts — Web Technologies Certificate, 2012

SKILLS

I have almost a decade of experience in software development. I am highly skilled in PHP, HTML, CSS, and JavaScript, but I possess many more skills beyond those languages such as strong knowledge of UNIX systems and many flavors of SQL and NoSQL. I am an expert with CakePHP, jQuery, and LESS CSS. I am also skilled in Objective C (Mac/iPhone development), Java, and .NET (C#, VB.NET).
